Waste sorting and waste collection

How does it work?
Osby and Östra Göinge

Your local waste management partner

in the Göinge District

Food waste

Food waste must be binned in a paper bag. This reduces the risk of unpleasant odours, helps to keep flies away and ensures that the bin is more hygienic for everyone who comes into contact with it.

You can order extra bags for compostable waste (food waste) from our homepage or over the phone. Each household receives 3 packs of bags a year free of charge.

The holder for food waste bags can be fixed in your sink cabinet. Please use the holder, as this enables air to circulate around and within the bag, which is more hygienic and reduces odours.

Sorting waste at source

Sorting waste at source means that you sort your waste at home and put it in the correct container for collection. We then take responsibility for making sure waste is recycled or reused in the best possible way. Sorting at source and recycling help to reduce your costs for waste management while also benefiting the environment.

All waste must be sorted

See our Sorting Guide on www.ograb.se

Leaving unsorted waste or mixed waste for collection is not allowed.

Certain kinds of waste must be bagged:

- Food waste
- Soft plastic (use the Minimizer)
- Combustible waste/Waste for incineration

The following kinds of waste may be placed loose in the bin:

- Paper packaging
- Plastic packaging
- Glass packaging
- Metal packaging
- Newspapers

On the day when waste is collected, the bins should be moved as close as possible to the place where the collection vehicle can stop.

The distance between the bins and the collection vehicle must not exceed 10 metres.

Handle pointing outwards

I have a second of the second of

Some people always store their bins as shown. Others prefer to stand them elsewhere a

Waste bins

Waste containers are supplied to you, as our customer, on loan.
 The containers are owned by ÖGRAB.

You are responsible for storing the bins safely and for cleaning and maintenance.

- Bins must not be overfilled or excessively heavy.
- "Hook-on" boxes must be hung in place on the respective bin when they are full and require emptying.
- Where should bins be placed on waste collection days?
- Max. 10 metres walking distance from where the waste collection vehicle stops.
- Bins must be placed with handles facing collection personnel.
- The path to the bins must be free from obstacles and the surface must be firm so that bins roll easily.
- In winter the path to the bins must be clear of snow and ice.
- Access to the property must be adequate to accommodate the waste collection vehicle.
 See minimum access dimensions below.

If your bins are not emptied

Sometimes there may be a delay in emptying bins. Vehicles may break down, drivers may fall ill, etc. For this reason, leave the bins at the usual collection point until they have been emptied. If there is a delay of more than one day, you are asked to contact Customer Service. Please note, however, that when a week includes a public holiday, emptying may take place 1–2 days earlier or later than scheduled.

Waste which is incorrectly sorted will not be collected. A message will be left on the bin so that you can correct your mistake. In winter, please make sure that the contents of bins are not frozen fast to the sides or bottom of the bin on collection days.

THIS IS HOW YOU S

Bin 1 - emptied once every 4 weeks

NEWSPAPERS

Placed loose in the relevant compartment in the bin

Newspapers, magazines, circulars, computer and writing paper, brochures, paperback books, advertising leaflets, catalogues, etc.

NEWS-

PAPERS

COLOURED

GLASS

PAPER

METAL PACKAGING

PACKAGING

PAPER PACKAGING

Placed loose in the relevant compartment in the bin

Milk cartons, sugar and flour bags, washing powder boxes, cornflakes boxes, pizza and cake cartons, wrapping paper, freezer cartons, egg boxes, paper mugs, cardboard tubes from kitchen/toilet rolls and other packaging containing at least 50% paper.

NEWSPAPERS are recycled and turned into new paper products.

COLOURED GLASS

Placed loose in the relevant compartment in the bin

Bottles and jars.

Place metal caps, bottle tops and lids in metal packaging.

PLEASE NOTE! Glass other than packaging (for example, window glass, drinking glasses and coffee pots) is placed in the Landfill container or handed in at a Recycling Centre (ÅVC).

PACKAGING MADE OF CARD AND PAPER is recycled to make new packaging or cardboard.

METAL PACKAGING

Placed loose in the relevant compartment in the bin

Tins, cans, lids, metal tubes, aluminium foil, bottle tops, empty spray cans, tealight holders and other packaging containing at least 50% metal.

Tins and cans take up less space if they are opened at both ends and flattened.

PLEASE NOTE! Metal other than packaging is placed in the Landfill container or handed in at a Recycling Centre (ÅVC).

GLASS is turned into new glass products or insulation materials.

METAL PACKAGING that is melted down and re-used saves 75% of the energy needed to produce new packaging from iron ore.

1 Batteries

Placed loose in the "hook-on" box

Lightbulbs Placed loose in the "hook-on" box

BATTERIES can be processed to recover metals. The plastic is separated and used in new batteries and the mercury is disposed of safely.

LIGHTBULBS can be processed to recover glass, aluminium, luminescent coatings and plastic.

SORT YOUR WASTE

Bin 2 – emptied once every 2 weeks

COMBUSTIBLE PLASTIC

WASTE

CI FAR

GLASS

PACKAGING

FOOD

WASTE

COMBUSTIBLE WASTE

Packaged

Nappies/diapers, sanitary towels, household utensils, washing-up brushes, CDs, cotton buds, envelopes, books, vacuum cleaner bags, cigarette ends, chewing gum, facecloths, baby wipes, kitchen towels, napkins, ash, soot, cat sand, pet waste bags, etc.

PLASTIC PACKAGING

Placed loose in the relevant compartment in the bin

Shampoo bottles, drinks bottles, ketchup bottles, plastic containers for dairy products, desserts, etc., disposable plastic mugs and plates, plastic bags, plastic foil, plastic sacks, etc. Extruded polystyrene used for packaging, and other packaging consisting of at least 50% plastic. Soft plastic is compressed and packed with the aid of the Minimizer.

COMBUSTIBLE WASTE is incinerated in heating plants to provide energy-efficient district heating.

CLEAR GLASS

Placed loose in the relevant compartment in the bin

Bottles and jars.

Place metal caps, bottle tops and lids in metal packaging. PLEASE NOTE! Glass other than packaging (for example, window glass, drinking glasses and coffee pots) is placed in the Landfill container or handed in at a Recycling Centre (ÅVC).

PLASTIC PACKAGING is recycled to make loading pallets, furniture components, noise barriers and washing-up brushes.

FOOD WASTE

Well-packed in compost bags

Egg shells and potato peelings, fish remains, fruit and vegetable waste, coffee grounds, coffee filters, tea leaves, food waste from meat, fish, poultry, potatoes, vegetables, bread, cheese, cakes, etc.

GLASS is turned into new glass products or insulation materials.

FOOD WASTE is processed in an approved facility to produce biogas for use in vehicles and biofertilizer for agriculture.

Small electrical waste

Placed loose in the "hook-on" box

Electric shavers, mobile phones, electric toothbrushes, etc.

After dismantling and sorting, the various fractions are processed to produce new raw materials or energy, and environmentally hazardous components are safely disposed of.

This is what to do with your other waste

We can collect bulky waste items, electrical waste, hazardous waste and landfill waste from your property up to 4 times a year. Please order collection at least one week before the scheduled collection date, online via www.ograb. se or by phoning Customer Service on 044-709 59 90.

Bulky waste

Domestic waste that is too bulky to fit into the bins. This covers only the kind of large domestic items that people take with them when moving house. No interior fittings (doors, kitchen cabinets, etc.) or car parts. **Collected** from your home. **Order collection** at least one week before the scheduled collection date. Maximum 10 items per collection. Bulky waste must **not** be packed in sacks.

Hand in at a staffed Recycling Centre (ÅVC). Waste fractions may be sorted differently at different Recycling Centres. Always ask staff for instructions.

Hazardous waste

Oil, paint, solvents, etc.

Collected from your home if items can fit into the Hazardous waste container. Always specify the contents of the box when ordering collection.

Order collection online or by phone (as described above).

Hand in at a staffed Recycling Centre (ÅVC).

The contents of bottles and jars, etc. must be clearly labelled. If you are uncertain about anything, contact Recycling Centre staff.

Collected from your home in the Landfill container when this is full. **Order collection** online or by phone (as described above).

Porcelain, ceramics, pots, pans, mirrors, etc.

Electrical waste

TV, radio, computer, household appliances, refrigerator, freezer, etc.

I waste Collected from your home. Order collection online or by phone (as described above). Fluorescent tubes (max. 3 packed together)

may be placed beside the bin for collection.

Hand in at a staffed Recycling Centre (AVC).

Grass cuttings, moss, branches, leaves, etc.

Collected from your home. You can subscribe for a garden waste bin, 370 litres or 240 litres in size. The bin is emptied once every two weeks between March and November. Your subscription entitles you to collect 1 cubic metre of compost soil from the Recycling Facility in Kattarp. Contact staff there on arrival. Phone us to arrange a subscription for garden waste collection.

Hand in at a staffed Recycling Centre (ÅVC).

Clothing, towels, bedding, covers, curtains, etc.

Deposit in containers located in urban areas, **or hand in** at a staffed Recycling Centre (ÅVC). Thanks to technical advances it is now possible to recover fibres from worn textiles. Clothes, shoes and accessories that can be re-used are sent to people in need in other countries, or sold to generate income for aid organisations.

By depositing your old textile products in the green containers, you are also doing the environment a good turn.

Recycling textiles also saves us the cost of incinerating them.

Go to www.ograb.se to find out where our Textile containers are located.

Medicines and hypodermic needles.

Hand in at a chemist's.

Medicines: place medicines in a transparent plastic bag or one of the special medicine waste bags available from the chemist's. Chemists do not accept discarded medical thermometers or used batteries. Hypodermic needles: return these in the special container available free of charge from the chemist's. It is prohibited to dispose of hypodermic needles as combustible waste. However, once the needle has been removed, the syringe itself may be placed in combustible waste. The container for hypodermic needles is returned to the chemist's when full.

Tips for simple sorting at home

Households are required to sort their waste into between 9 and 12 different fractions. However, you don't need to sort everything directly in the kitchen. You can put all packaging in the same container and then sort it when you take it out to the bins.

Combustible waste

Use a suitable container for this, line it with a plastic bag and tie the bag before placing it in the bin.

Packaging

(glass, metal, plastic and paper/card) If you are short of space, put all packaging in the same container in the kitchen and then sort it when you take it out to the bins. Fold, stack and flatten packages before placing them in the bin.

Food waste

Must be packed in a bag made of compostable paper (see page 2). Drain off any water, liquids, juices, etc. before placing food waste in the bag. It is a good idea to place newspaper at the bottom of the bag to absorb dampness. Do not fill the pag above the dotted line.

Landfill

Households usually generate very little landfill waste, so there is no need for a special container.

Use the Minimizer to compress soft plastic packaging.

Hazardous waste Put this in your Hazardous waste container.

Newspapers

Collect newspapers at home and then place them loose in the bin.

Batteries, bulbs and small electrical waste

Put these in the respective "hook-on" box and hang it on the bin when

The waste hierarchy

It is important that we all play our part in reducing the amount of waste we generate.

Try to buy products that generate as little waste as possible.

Instead of throwing away items that someone else can use, hand them in for recycling or take them to a second-hand shop.

Sorting all your packaging provides raw materials for new packages.

Recover energy

Recycle

Any remaining combustible waste can be incinerated to generate energy.

Landfill

When none of the above is viable, landfill is the only remaining option.

RECYCLING CENTRE OPENING HOURS

Your subscription to waste collection services authorises you to deposit sorted fractions of domestic waste in our Recycling Centres (ÅVC). Householders may deposit as much waste as can be safely carried on a trailer behind a private car. Larger amounts of waste must be deposited at Kattarp.

Main office: Kattarp Switchboard 044-790 59 80 Customer Service 044-790 59 90

	Mon	Tues	Wed	Thurs	Fri	Sat

* = 1 April – 30 Sept * = 1 Oct – 31 March Always check opening hours on www.ograb.se

We have installed a barrier at the entrance to our Recycling Centres (ÅVC) in Kattarp, Osby and Knislinge. As a subscriber to our waste collection services, you can raise the barrier by scanning your driving licence.

(Please note: Swedish driving licence only!) If there are other members of your household who would like to use this service, they can register their driving licence by completing an online form on our website: www.ograb.se or by filling out a form that is available at our Recycling Centres.
